## Introduction

# Qualifications Pack- Machine Operator Assistant – Blow Moulding

SECTOR: RUBBER

SUB SECTOR: MANUFACTURING/ PLASTICS PROCESSING

**OCCUPATION: BLOW MOULDING** 

REFERENCE ID: RSC/Q4101 (CPC/Q0403) ALIGNED TO:

#### **Brief Job Description:**

The individual will be assisting the machine operator. They will be assisting for Smooth and safe operation/ repair/ maintenance of the equipment at site, help the operator for operating semi & fully automatic and advance blow moulding machines. Monitoring during loading & unloading of Moulds, Machine Set up, Moving Spare parts, raw material & finished components from and to the stores etc. They are having basic knowledge of troubleshooting process problems and performing minor maintenance to ensure continued operation of the production line.

#### **Personal Attributes:**

This job requires the basic communication & written abilities for the individuals to be result oriented. Basic Knowledge of maintaining equipments & housekeeping process, ability to do physical tasks like lifting, holding etc. and dexterity. He must also demonstrate strong work ethics, courteously with co-workers, and must be good with following instructions of the supervisor/operator.

Qualifications Pack Code	RSC/Q4101 (CPC/Q0403)		
Job Role	Machine Operator Assistant - Blow Moulding		
Credits (NSQF)	24	Version number	1.0
Sector	Rubber	Drafted on	18/05/2016
Sub Sector	Manufacturing / Plastics Processing	Last reviewed on	26/12/2016
Occupation	Blow Moulding	Next review date	31/12/2021
NSQC Clearance on	21/07/2016		

Job Role	Machine Operator Assistant- Blow Moulding		
Role Description	This role is involved in assisting the operator and the entire team in peripheral activities/ non core activities in the production process.		
NSQF level	3		
Minimum Educational Qualifications* Maximum Educational Qualifications*	VIII <sup>th</sup> Standard		
Training (Suggested but not mandatory)	No previous training required		
Minimum Job Entry Age	18		
Experience	No previous experience required		
Applicable National Occupational Standards (NOS)	<ul> <li>Compulsory: <ol> <li>RSC/N4101 (CPC/N0411): Maintain basic health and safety practices at the workplace, 5S.</li> <li>RSC/N4102 (CPC/N0412): Fitting Tools Measuring Equipments &amp; Practice</li> <li>RSC/N4103 (CPC/N0413): Introduction to Polymers and thermoplastics Materials</li> <li>RSC/N4104 (CPC/N0414): Basics of Plastics Processing methods</li> <li>RSC/N4105 (CPC/N0415): Blow Moulding Techniques for Plastics processing and inspection of the finished products.</li> <li>RSC/N4106 (CPC/N0416): Auxiliary equipments in Plastics processing.</li> <li>RSC/N4107 (CPC/N0417): Mould Technology Techniques for Plastics Processing</li> <li>RSC/N4108 (CPC/N0418) : Basic Knowledge of Communication/soft skills.</li> </ol> </li> </ul>		
Performance Criteria As described in the relevant OS units			

	Keywords /Terms	Description
initions	Core Skills/Generic Skills	Core Skills or Generic Skills are a group of skills that are key to learning and working in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Der	Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
	Function	Function is an activity necessary for achieving the key purpose of the sector, occupation, or area of work, which can be carried out by a person or a group of persons. Functions are identified through functional analysis and form the basis of OS.
	Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organization.
	Knowledge and Understanding	Knowledge and Understanding are statements which together specify the technical, generic, professional and organizational specific knowledge that an individual needs in order to perform to the required standard.
	Occupational Standards (OS)	OS are Occupational Standards which apply uniquely in the Indian context
	Occupation	Occupation is a set of job roles, which perform similar/related set of functions in an industry.
	Organizational Context	Organizational Context includes the way the organization is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
	Performance Criteria	Performance Criteria are statements that together specify the standard of performance required when carrying out a task.
	Qualifications Pack(QP)	Qualifications Pack comprises the set of NOS, together with the educational, training and other criteria required to perform a job role. A Qualifications Pack is assigned a unique qualification pack code.
	Qualifications Pack Code	Qualifications Pack Code is a unique reference code that identifies a qualifications pack.
	Scope	Scope is the set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on the quality of performance required.
	Sector	Sector is a conglomeration of different business operations having similar businesses and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
	Sub-Sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
	Sub-functions	Sub-functions are sub-activities essential to fulfil the achieving the objectives of the function.
	Technical Knowledge	Technical Knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
	Unit Code	Unit Code is a unique identifier for a OS unit, which can be denoted with an 'N'

Unit Title	Unit Title gives a clear overall statement about what the incumbent should be able to do.
Vertical	Vertical may exist within a sub-sector representing different domain areas or the client industries served by the industry.

## **Overview**

This unit Covers health, safety and security at the work place. This includes procedures and practices that candidates need to follow to help maintain a healthy, safe and secure work environment.

Unit Code		RSC/N4101 (CPC/N 0411)	
	Unit Title (Task)	Maintain basic health and safety practices at the workplace, 5S	
	Description	This OS unit is about knowledge and practices relating to health, safety and security that candidates need to use in the workplace. It covers responsibilities towards self, others, assets and the environment. It includes understanding of risks & hazards in the workplace, along with common techniques to minimize risk, deal with accidents, emergencies etc. It covers knowledge of fire safety, common first aid applications and safe practice. This OS is about ensuring all 5S activities both at the shop floor and the office area to facilitate increase in work productivity.	
	Scope	<ul> <li>The role holder will be responsible for</li> <li>Health and safety procedure.</li> <li>Fire safety procedure.</li> <li>Emergencies, rescue and first aid procedures.</li> <li>Ensure sorting, stream lining, storage and documentation, cleaning, standardization and sustenance across the plant premises of the organization.</li> </ul>	
	Performance Criteria (F	PC) w.r.t. the Scope	
	Element	Performance Criteria	
	Health and safety	<ul> <li>The individual on the job should ensure to:</li> <li>PC1. Wear protective clothing/equipment for specific tasks and work conditions</li> <li>PC2. Carry out safe working practices while dealing with hazards to ensure the safety of Self and others.</li> <li>PC3. Ensure good housekeeping practices at all times</li> </ul>	
	Fire safety	<ul> <li>The individual on the job should be able to:</li> <li>PC4. Use the various appropriate fire extinguishers on different types of fires correctly</li> <li>PC5. Demonstrate rescue techniques applied during fire hazard, demonstrate good housekeeping in order to prevent fire hazards, demonstrate the correct use of a fire extinguisher.</li> </ul>	
	Identify and report the risks identified	<ul> <li>PC6. Identify activities which can cause potential injury through sharp objects, burns, fall, electricity, gas leakages, radiation, poisonous fumes, chemicals, loud noise, and Identify areas in the plant which are potentially hazardous / unhygienic in nature. Conduct regular checks with support of the maintenance team on machine health to identify potential hazards due to wear and tear of machine.</li> <li>PC7. Inform the concerned authorities on the potential risks identified in the processes, workplace area/ layout, materials used etc, Inform the concerned authorities about machine breakdowns, damages which can potentially harm man/ machine during operations.</li> <li>PC8. Create awareness amongst others by sharing information on the identified risks.</li> </ul>	

Ensure sorting Ensure proper documentation and storage( organizing, streamlining)	sure sorting       PC9. Follow the sorting process and check that the tools, fixtures & jigs that a lying on workstations are the ones in use and un- necessary items are a cluttering the workbenches or work surfaces.         PC10. Ensure segregation of waste in hazardous/ non Hazardous waste as per the sorting work instructions       PC11. Follow the technique of waste disposal and waste storage in the proper bins per SOP         PC12. Segregate the items which are labeled as red tag items for the process at and keep them in the correct places       PC13. Sort the tools/ equipment/ fasteners/ spare parts as per specifications/ util into proper trays, cabinets, lockers as mentioned in the SS guidelines/ we instructions         PC14. Ensure that areas of material storage are not overflowing       PC16. Return of extra material and tools to the designated sections and make so that no additional material/ tool is lying near the work area         PC16. Return of extra material and tools to the designated sections and make so that no additional material/ tool is lying near the work area         PC17. Follow the floor markings/ area markings used for demarcating to various sections in the plant as per the prescribed instructions a standards         PC18. Follow the groper labelling mechanism of instruments/ boxes/ containers a maintaining reference files/ documents with the codes and the lists         PC19. Ensure to check the items in the respective areas have been identified broken or damaged         PC20. Follow the given instructions and check for labelling of fluids, o lubricants, solvents, chemicals etc. and proper storage of the same to av spillage, leakage, fire etc.         PC21. To make sure that all material and

KB31.To have skills to identify useful & non useful itemsKB32.To have knowledge of labels , signs & colours used as indicatorsKB33.To have knowledge on how to sort and store various types of tools,	KB30 Understand to the 5S checklists provided in the department/team
KB32. To have knowledge of labels, signs & colours used as indicators KB33. To have knowledge on how to sort and store various types of tools,	KB31 To have skills to identify useful & non useful items
KB33. To have knowledge on how to sort and store various types of tools,	KB32. To have knowledge of labels, signs & colours used as indicators
	KB33. To have knowledge on how to sort and store various types of tools.
equipment, material etc.	equipment, material etc.
KB34. To know, how to identify various types of waste products	KB34. To know, how to identify various types of waste products
KB35. Understand to the impact of waste/ dirt/ dust/unwanted substances on the	KB35. Understand to the impact of waste/ dirt/ dust/unwanted substances on the

	process/ environment/ machinery/ human body.			
	KB36. To have knowledge of best ways of cleaning & waste disposal			
Skills (S) [Optional]	·			
Element	Skills			
A. Core Skills/	Writing Skills			
Generic Skills	The user/ individual on the job needs to know and understand how to:			
	SA1. Understand basic level notes and observations.			
	Reading Skills			
	The user/individual on the job needs to know and understand about the:			
	SA2. safety instructions put up across the plant premises			
	SA3. Safety precautions mentioned in equipment manuals and panels and			
	understand the potential risks associated			
	Oral Communication (Listening and Speaking skills)			
	The user/individual on the job needs to know and understand how to:			
	SA4. Effectively communicate information to team members			
	SA5. Inform employees in the plant and concerned functions about events,			
	Incidents & potential risks observed related to Safety, Health and			
	Environment.			
	SA6. Question operator/ supervisor in order to understand the safety related			
	issues			
	SA7. Attentively listen with full attention and comprehend the information given			
	by the speaker during safety drills and training programs			
B. Professional Skills	Plan and Organize			
	The user/individual on the job needs to know and understand how to:			
	SB1. Process the work order and jobs received from the internal customers.			
	SB2. Design documents received from internal customers			
	SB3. Understand & organize all process/ equipment manuals so that sorting out			
	information is fast.			
	Judgment and Critical Thinking			
	The user/individual on the job needs to know and understand how to:			
	SB4. Use common sense and make judgments during day to day basis			
	SB5. Use intuition to detect any potential problems which could arise during			
	operations			
	Desire to learn and take initiatives			
	The user/individual on the job needs to know and understand how to:			
	SB6. Follow instructions and work on areas of improvement identified			
	SB7. Complete the assigned tasks with minimum supervision			
	SB8. Complete the job defined by the supervisor within the timelines and quality			
	norms

#### RSC/N4102 (CPC/N 0412) Fitting Tools Measuring Equipments and Practice

## **Overview**

This unit covers for provides basic knowledge on fitting operations on machining components using hand tools to make shape of the component from raw material as per given drawing specifications. Basic knowledge about performing fitting operation to maintain blow moulding machine and mould.

#### RSC/N4102 (CPC/N 0412) Fitting Tools Measuring Equipments and Practice

Unit Code	RSC/N4102 (CPC/N0412)
Unit Title (Task)	Fitting Tools Measuring Equipment's and Practice
Description	This OS unit give Basic knowledge to candidates for fitting of machining components using hand tools and manually operated machines, to form the shape of a component from raw material, as per given specifications in the drawing. This involves assisting for smooth & safe operation/repair/maintenance of the equipment at site. The candidate will be expected to perform under minimum supervision, taking self-interest at work and for the quality and accuracy of the work.
Scope	<ul> <li>The blow Moulding person will be responsible for</li> <li>Working safely</li> <li>Basics of fitting operations</li> <li>Marking components</li> <li>Basics about performing fitting operation to maintain blow Moulding machine and Mould.</li> </ul>
Performance Criteria (PC	) w.r.t. the Scope
Element	Performance Criteria
Working safely	<ul> <li>The individual on the job shall be able to:</li> <li>PC1 Comply with health and safety, environmental and other relevant regulations</li> <li>PC2 Adhere to procedures and guidelines for personal protective equipment (PPE) and other relevant safety regulations while performing die fitting operations</li> <li>PC3 Work following laid down procedures and instructions</li> <li>PC4 Ensure work area is clean and safe from hazards</li> <li>PC5 Ensure that all tools, equipment, power tool cables, extension leads are in a safe and usable condition</li> </ul>
Preparing for fitting operations	<ul> <li>The individual on the job shall be able to:</li> <li>PC6. Ensure job specification from a valid and approved source</li> <li>PC7. Adhere to job requirements from the job specification document properly</li> <li>PC8. Report to operator information time to time.</li> <li>PC9. Learn basic fitting operations as per procedure</li> <li>PC10. Ensure that all calibrated measuring instruments used.</li> <li>PC11. Ensure that the components used are free from foreign objects, dirt and corrosion</li> <li>PC12. Obtain appropriate tools and measuring instruments.</li> <li>PC13. Adhere to work pieces as per job requirements using appropriate holding devices</li> </ul>
Marking components	The individual on the job shall be able to: PC14. Help the operator while marking specified features with the help of marking- out methods on the work pieces as per job specification by using appropriate measuring and marking tools.
Performing fitting operations on machining components using	<ul> <li>The individual on the job should be able to:</li> <li>PC15. Learn the different fitting operations on various forms of metal components using a range of hand tools and manually operated machines</li> <li>PC16. Carrying &amp; return to all tools and equipment to the correct location on</li> </ul>

### **Overview**

This unit covers for provide basic Knowledge of polymers and Understanding the difference between plastics & other materials. Thermoplastics materials and their properties and end use application. Basic Knowledge of Polymer Identification Methods.

Unit Code	RSC/N4103 (CPC/N0413)
Unit Title (Task)	Introduction to Polymers and Thermoplastics Materials
Description	<ul> <li>This unit is about Introduction to Polymers Thermoplastics Materials</li> <li>1. Types of Polymers.</li> <li>2 Difference between plastics &amp; other materials.</li> <li>3. Become familiar with thermoplastics materials.</li> <li>4. Recognize the potential value of polymeric materials and their areas of Application.</li> </ul>
Scope	<ul> <li>The Blow moulding person will be learning about.</li> <li>Types of Polymers, Types of Plastics &amp; its Properties. Processing behavior and applications</li> <li>Use of Polymers and their applications in industries like Bottles, Hollow container, automotive fuel aerospace, etc.</li> </ul>
Performance Criteria	(PC) w.r.t. the Scope
Element	Performance Criteria
Introduction To Polymers	To be competent, the user/individual on the job must be able to Introduction:- PC1. Learn the basic Importance of polymers Ruman Life. PC2. Learn the fundamental terminology of polymers PC3. Identify the types of polymers & its application.
Study of Plastics Material	<ul> <li>PC4. Learnig about types of Polymers-Thermoplastics, Elastomers.</li> <li>PC5. Learn the plastic Material Applications- Commodity sector, telecommunications, automobiles, packaging medical, Electrical and Electronics &amp; aerospace etc.</li> </ul>
Thermoplastic Materials	<ul> <li>PC6. Study about Commodity Polymers: Polyolefin: LDPE – HDPE – LLDPE, PP etc.</li> <li>PC7. Study about Engineering Polymers: PC, ABS, PMMA, POM, PA-NYLON etc.</li> <li>PC8. Study about Special Polymers: FEP, PVDF etc.</li> </ul>
Identification of Plastics Material	PC9. Learn the Identification Method:-Drop Test, water floatation Test, Scratch test. PC10. Learn the advanced methods of Identification:-MFI, Melting etc.
Knowledge and Unde	rstanding (K)
A. Organizational Context (Knowledge of the company / organization and its processes)	<ul> <li>The user/individual on the job needs to know and understand:</li> <li>KA1. Relevant standards specified to identify the polymers</li> <li>KA2. Basic process to be followed for inspection of the lot.</li> <li>KA3. Batch size, material grade and nomenclature.</li> </ul>
B. Technical	The user/individual on the job needs to know and understand:

Knowledge	KB1. About identification of polymers.
	KB2. About the instruments burner, copper rods, solvents, weighing scales and other
	instruments and machineries to identify the polymers and its properties.
	KB3. Knowledge to identify quality defects.
	KB4. Working knowledge and procedure of testing and identifying machines.
Skills (S) [Optional]	
A. Core Skills/	Writing Skills
Generic Skills	The user/ individual on the job needs to know and understand how to:
	SA1. Read the values and process of polymer with specification.
	SA2. Knowledge about different type of format relevant to the polymer identification.
	Reading Skills
	The user/individual on the job needs to know and understand how to:
	SA3. Read values and equipment manuals to understand the working of the
	equipment
	SA4. Understand measuring instruments reading to identify any deviations from the
	dimensions given in the standards.
	Oral Communication (Listening and Speaking skills)
	The user/individual on the job needs to know and understand how to:
	SA5. Inform supervisor/operator of any quality related defects arising out of the
	manufacturing process
	SA6. Question internal customers/ supervisor appropriately in order to understand
	the nature of the problem and make a Diagnosis
B. Professional	Plan and Organize
Skills	The user/individual on the job needs to know and understand how to:
	SB1. Use common sense and make judgments during day to day basis use reasoning
	skills to identify and resolve basic problems
	SB2. Understand & Carefully analyze the body part for various assembling defects at
	every station.
	SB3. Carefully analyze each defect observed during inspection and try to find solution
	for the defect along with the assembly line operator.
	Quality Consciousness
	The user/individual on the job needs to know and understand how to:
	SB4. Identify defective materials in the manufacturing line by comparing
	manufactured hollow articles(container; bottles) with the work standard
	SB5. Link the defect observed with the overall impact on the performance of the
	output.

RSC/N4104 (CPC/N 0414) Basics of Plastics Processing Methods

# National Occupational Standards

## **Overview**

This unit provides basic knowledge of plastics processing methods with respect to various products, types of equipment /process used and melt processing ranges of various polymer formulations to make plastic products in comparison with blow mouldings are discussed. Depending upon the configuration of the part, the selection of processing methods and economic viability are also discussed.

National Occupational Standards

#### RSC/N4104 (CPC/N 0414) Basics of Plastics Processing Methods

Unit Code	RSC/N4104 (CPC/N 0414)
Unit Title (Task)	Basics of Plastics Processing Methods
Description	<ul> <li>This unit is about Basics of Plastics Processing methods</li> <li>1. There are a variety of methods used to process plastic. Each method has its advantages and disadvantages and are better suited for specific applications.</li> <li>2. Plastics processing encompasses the processing, design, development, and Manufacture of plastics products.</li> </ul>
Scope	<ol> <li>Plastic industry is making significant contribution.development and growth of various key sectors such as: Automotive, Construction, Electronics, Healthcare, Textiles etc.</li> <li>Ensure the merits and demerits of Blow Moulding to over the all others plastic Process.</li> <li>Basic fundamental of Plastics Processing Methods.</li> </ol>
Performance Criteria (	PC) w.r.t. the Scope
Element	Performance Criteria
Introduction to Plastics Processing	<ul> <li>To be competent, the user/individual on the job must be able:</li> <li>PC1. Learn the all plastics processing Machineries.</li> <li>PC2. Identify merits and demerits of Blow Moulding and over all others plastic Process.</li> <li>PC3. Ensure the definition and terminology related to Plastic Processing.</li> <li>PC4. Ensure the finishing operation including surface treatment of the fabricated product if required as per SOP.</li> </ul>
Classification of processing methods	<ul><li>PC5. Follow the Primary Processing Methods as per SOP.</li><li>PC6. Follow the Secondary Processing Methods as per SOP.</li><li>PC7. Follow the Fundamentals of processing method.</li></ul>
Processing methods	<ul> <li>PC8. Adhere the type of process to be used depends on a variety of factors, including product shape and size, plastic type, quantity to be produced, quality and accuracy (Tolerances) required, design load performance, cost limitation, and time schedule.</li> <li>PC9. Follow the Machine Operation Terminology: as per manual, semiautomatic, fully automatic.</li> <li>PC10. Learning about the type of Conversion Techniques: Injection, Blow, Compression, Transfer, Rotational and Other processes.</li> <li>PC11. Identify the Material to be processed</li> <li>PC12. Ensure the Product design / configuration, Tolerance.</li> <li>PC13. Ensure the process Limitations</li> <li>PC14. Ensure the quality</li> <li>PC15. Ensure the cost / Performance balance.</li> </ul>
Knowledge and Unde	rstanding (K)
A. Organizational	The user/individual on the job needs to know and understand:
Context	KA1. Relevant standards specified for the Processing
(Knowledge of the company / organization and its processes)	KA2. Basic process followed through manual.

National Occupational Standards

#### RSC/N4104 (CPC/N 0414) Basics of Plastics Processing Methods

B. Technical	The user/individual on the job needs to know and understand:
Knowledge	KB1. The Processes and procedures followed for Processing the lot/ pieces/
	products.
	KB2. The Techniques of using measurement instruments like rulers, Vernier
	calipers, micrometers, weighing scales etc.
	KB3. The Methods to identify quality defects in the Processing.
	KB4. The Methods used for cutting, finishing which can repair lot with minor
	defects
Skills (S) [Optional]	
A. Core Skills/	Writing Skills
Generic Skills	The user/ individual on the job needs to know and understand how to:
	SA1. Note the number of lot with defects which can be repaired to number of lot
	which will be discarded.
	Reading Skills
	The user/individual on the job needs to know and understand how to:
	SA2. Understand process and equipment manuals to understand the working of the
	equipment
	SA3. Understand measuring instruments reading to identify any deviations from the
	dimensions given in the product enginee (ing) drawing
	Oral Communication (Listening and Speaking skills)
	The user/individual on the job needs to know and understand how to:
	SA4. Inform supervisor/operator of any quality related defects arising out of the
	manufacturing process
	SA5. Question internal customers/ supervisor appropriately in order to understand
	the nature of the problem and make a Diagnosis
B. Professional	Plan and Organize
Skills	The user/individual on the job needs to know and understand how to:
	SB1. Maintain all process/ equipment manuals so that sorting/ accessing
	information is easy
	SB2. Keep fixtures, tools, drawings, Work Instructions, SOP manuals as per the part
	number, colour codes etc. as defined under the 5S systems.
	Critical Thinking & Judgment
	The user/individual on the job needs to know and understand how to:
	SB3. Use common sense and make judgments during day to day basis
	SB4. Carefully analyze the body part for various assembling defects at every station
	Quality Consciousness
	The user/individual on the job needs to know and understand how to:
	SB5. Identify defective parts in the manufacturing line by comparing manufactured
	hollow articles (container; bottles) with the work standard and other processes.

RSC/N4105 (CPC/N 0415) Blow Moulding Techniques for Plastics Processing & Inspection of the finished goods

Unit Code	RSC/N4105 (CPC/N0415)
Unit Title	Blow Moulding Techniques for Plastics Processing & Inspection of the finished goods
(Task)	
Description	This unit is about the various Blow Moulding Techniques for Plastics. The person will
	gain a knowledge of EBM,IBM and SBM for -
	1. Blow Moulding process and its basic principles.
	2. Detailed types of blow moulding process.
	3. Production of Parisons / Performs.
	4. About Continuous and intermittent blow Moulding process.
	5. Machine Startup & Shut down Procedure.
Scope	The blow moulding person will be responsible for
	Helping to operator in Blow moulding machine to produce the Parison/ Performs
	and identify the sequence of operation to produce the required output EBM, IBM
	and SBM.
	Feeding the granules as per requirement.
	<ul> <li>Inspect the finished hollow articles (Bottles; container).</li> </ul>
	Auto / manual deflashing the product.
	Keeping records of production and defects.
	Conducting minor repair on output parts which can be reworked.
	<ul> <li>Involving in Prepare &amp; document daily production reports, including rejects.</li> </ul>
	regrinds line efficiencies and other

![](_page_25_Picture_3.jpeg)

process parameters	PC16. Ensure mould lifting/ ejection/ slide mechanism of the press are properly
	functioning
	PC17. Add the manufacturing preform as per SOP
	PC18. Remove the Manufacturing preform from the mould as per SOP.
Check the operations of the equipment used in the Extrusion blow moulding process	<ul> <li>PC19. Check for operation of moulding apparatus like hopper, heaters, extruder, blow moulding die/mould, screen pack etc. as per the checklist provided</li> <li>PC20. Fix the desired die/mould to the blow moulding machine apparatus in order to achieve the desired operation as per the Work Instructions/ SOPs</li> </ul>
Study of process	PC21. Ensure the preliminary requirement and preparation of raw material use
parameters for the	weighing machines to measure the quantity of granules and ensure that the
blow moulding as	correct quantity of granules are put in the hopper
per SOP	PC22. Setup the apparatus as per the selected process and the moulding standards
	used in the processing industry
	PC23. Ensure availability of the coolant and working of valves to circulate the coolant to
	cool and solidify plastic.
Study of parison	PC24. Ensure the functionality and assembly of die as per SOP.
Programming and	PC25. Ensure the die shaping in blow moulding.
Controlling of	PC26. Ensure the basic study of Blow Ratio, Parison swell, Die Swell, Types of Parison
Parison and	Blowing system:-Pneumatic and ejection system.
Preform	
Organize for the	PC27. Ensure the basic Study of moulding process read process to be adopted for
material to be	completing the work order from the supervisor/operator by referring the Work
moulded and	Instruction document/ SOP manual
apparatus required	PC28. Identify the raw material like plastics granules, fillers, bonding additives grades
for the same	etc. required for executing the activity
	PC29. Ensure that the required material is procured from the store before starting the
	process.
	PC30. Ensure that type of die required for executing the required operation and
	PC21 Ensure that number of heaters required for the extruder assembly heater
	temperature and current required for the heating operations as mentioned in
	the Work Instructions/ SOP manual Ensure housekeening safety in the
	moulding area. Use lifting equipments or for lift/trolley for mould/material
	Keen all safety requirements
Feed the plastic	PC32. Ensure that plastic granules are mixed with additives (if any) before being fed
granules in the	into the hopper
hopper and	PC33. Check the hollow articles (bottles, container) for geometry, material &
conduct a test	dimensional parameters as per the Control Plan before starting the production.
process	PC34. Ensure that the dimensions of the output product are measured as per the
•	process given in the Work Instructions/ SOP
	PC35. Start the production process If the test product matches the dimensions and
	guality of the final output,

![](_page_26_Picture_0.jpeg)

![](_page_26_Picture_1.jpeg)

![](_page_26_Picture_2.jpeg)

![](_page_26_Picture_3.jpeg)

Conduct the actual	PC26 Each the required plastic material in the apparatus for heaters to malt the
moulding process	plastic granules at the predefined temperature
monitor the	PC27 Encure fooding in line with the defined standards and specifications
moulding process	PC37. Ensure the proper functioning of screen pack and die for uniform molting of
variations	plactic and removal of the contaminants (if any)
variations	PC20 Monitor & understand the process (parameters like temperature pressure
	speed atc ) by observing and analyzing the readings on various nanels/ meters
	to provent machine breakdown and deviations of the output from desired
	specifications
	PC40 Clean the dia opening & dia: changing the screen pack
	PC40. Clean the die opening & die, changing the screen pack.
	(wherever required) and cond the same for further processing
	PC42 Instruct the below to pack finishing and ninch off of the product as part the
	PC42. Instruct the helper to neck mishing and pinch of of the product as per the
Doutour the viewal	DC42 Measure the final plastic moulded product, and compare the dimensions as
Perform the visual	PC43. Measure the final plastic moulded product and compare the dimensions as
inspection of the	prescribed in the work order/ engineering drawing
output and misning	further processing in terms of outting finishing atc
	DC45 Hole the operator to Measure the specifications of the finished products using
finished goods to	devices like micrometers. Vernier caliners, gauges, rulers, weighing scales
detect any	Thickness Course and any other inspection equipment and compare with the
deviations from the	narrameters given in the work order
neoduct design	parameters given in the work order.

Skills (S) [Optional]	
A. Core Skills/ Generic	Writing Skills
Skills	The user/ individual on the job needs to know and understand how to: SA1. Understand number of lot with defects which can be repaired to number of lot which will be discarded
	Reading Skills
	<ul> <li>The user/individual on the job needs to know and understand how to:</li> <li>SA2. Read measuring instruments reading to identify any deviations from the dimensions given in the product engineering drawing</li> </ul>

![](_page_28_Picture_0.jpeg)

![](_page_28_Picture_1.jpeg)

![](_page_28_Picture_2.jpeg)

![](_page_28_Picture_3.jpeg)

	Oral Communication (Listening and Speaking skills)				
	The user/individual on the job needs to know and understand how to:				
	SA3. Inform supervisor /operator of any quality related defects arising out of the manufacturing process				
	SA4. Question internal customers/ supervisor appropriately in order to understand				
	the nature of the problem and make a Diagnosis.				
B. Professional	Plan and Organize				
Skills	The user/individual on the job needs to have Basic Knowledge on:				
	SB1. All process/ equipment manuals so that sorting/ accessing information is				
	easy				
	SB2. Fixtures, tools, drawings, Work Instructions, SOP manuals as per the part				
	number, colour codes etc as defined under the 5S systems.				
	Critical Thinking and Judgment				
	The user/individual on the job needs to know and understand how to:				
	SB3. Use common sense and make judgments during day to day basis				
	use reasoning skills to identify and resolve basic problems				
	SB4. Carefully analyze the body part for various assembling defects at every station				
	SB5. Carefully analyze each defect observed during inspection and try to find solution				
	for the defect along with the assembly line operator				
	Quality Consciousness				
	The user/individual on the job needs to know and understand how to:				
	SB6. Identify defective parts in the manufacturing line by comparing manufactured				
	(lot/articles) with the work standard

## **Overview**

This unit is to understand basic types of Auxiliary equipment's used in Plastics processing consisting of several components, such as material management, reclamation, heat transfer. Auxiliary equipment provides the source for every possible processing advantages in terms of productivity and quality output.

![](_page_31_Picture_3.jpeg)

Unit Code	RSC/N4106 (CPC/N0416)
Unit Title	Auxiliary equipment's in Plastics processing
(Task)	
Description	This OS unit is about Control and maintains auxiliary equipment, such as chillers
	pumps, fans, compressors, condensers, feed water heaters, filters, and chlorinators
	that supply water, fuel, lubricants, air, and auxiliary power for chillers.
Scope	The role holder will be responsible for
	• Opens and closes valves and switches in sequence upon signal from other worker
	to start or shut down auxiliary units.
Performance Criteria (	PC) w.r.t. scope
Element	Performance Criteria
Basic requirement of	To be competent, the user/individual on the job must be able to
Auxiliary	PC1. Inspect, monitor, operating fuel systems, fuel oil transfer, supply lines &
Equipments and	associated equipment and fossil fuel chillers.
machineries	PC2. Operate condensate and feed water systems, circulating and cooling water
	systems, condensate and makeup systems, circulating service water treatment
	equipment, auxiliary lube oil systems, emission control equipment and
	miscellaneous equipment. Pass onsite training programs. Follow the safety rules,
	regulations and procedures.
	PC3. Connects basic plant services as needed to meet production requirements and
	makes initial checks of operating conditions before initiating production runs.
	PC4. Assist in cleaning and lubrication of equipment and tooling and performs various
	preventative maintenance tasks as needed.
Different type of	PC5. Study adout different types of Predrier-Hot air Oven, Hopper Driers, Dehumidifiers
Auxiliary Equipment	etc.
	PC6. Study the basics of Chiller, Cooling Tower for the controlling temperature of
	Mould, machine and Fluids.
	PC7. Ensure the basic Operation and Monitoring Watching gauges, dials, or other
	indicators to make sure a machine is working properly.
	PC8. Study about the Compressor and Scrap Grinder.
Study process of	PC9. Ensure the equipment maintenance Performing routine maintenance on 🦈 🧹
operation and	equipment and determining when and what kind of maintenance is needed.
maintenance of	PC10. Ensure the Equipment Selection Determining the kind of tools and equipment
auxiliary equipment	needed to do a job.
	PC11. Follow the instructions given on the equipment manual describing the operating
	process of the equipment
	PC12. Follow the Safety, Health and Environment related practices developed by the
	organization
	PC13. Ensure relevant safety board's/ signs are placed on the shop floor
	PC14. Operate the machine using the recommended Personal Protective Equipment
	(DDE) and ansure team members also use the related DDEs at the workplace

(PPE) and ensure team members also use the related PPEs at the workplacePC15. Maintain a clean and safe working environment near the work place and ensure there is no spillage of chemicals, production waste, oil, solvents etc.

PC16. Attend all safety and fire drills to be self-aware of safety hazards and preventive

![](_page_32_Picture_0.jpeg)

![](_page_32_Picture_1.jpeg)

![](_page_32_Picture_2.jpeg)

	techniques				
	PC17. Maintain high standards of personal hygiene at the work place				
	PC18. Ensure that the waste disposal is done in the designated area and manner as r				
	organization SOP.				
Knowledge and Und	erstanding (K)w.r.t. the scope				
A. Organizational	The user/individual on the job needs to know and understand:				
Context (Knowledge of	f KA1. Relevant standards, procedures and policies related to auxiliaries machineries				
the company /	followed in the company				
organization and its	KA2. Emergency handling procedures & hierarchy for escalation				
processes)					
B. Technical	The user/individual on the job needs to know and understand:				
Knowledge	KB1. The startup procedure as per SOP				
	KB2. To have basic knowledge of Safety procedures( fire fighting, first aid) within the				
	organization				
	KB3. Basic knowledge of various types of PPEs and their usage				
	KB4. Basic knowledge of risks/hazards associated with each occupation in the				
	organization				
	KB5. Knowledge of personal hygiene and how an individual an contribute towards				
	creating a highly safe and clean working environment				
	KB6. Basic knowledge of various operations of machineries and equipment as per t				
	operation manual.				
	KB7. The shut down procedure as per SOP				
Skills (S)w.r.t. the sc	оре				
Element	Skills				
A. Core Skills/	Writing Skills				
Generic Skills The user/ individual on the job needs to know and understand how to:					
SA1. Understand basic level notes and observations					
	Reading Skills				
	The user/individual on the job needs to know and understand how to:				
	SA2. Read safety instructions put up across the plant premises				
	SA3. Read safety precautions mentioned in equipment manuals and panels to				
	understand the potential risks associated				
	Oral Communication (Listening and Speaking skills)				
	The user/individual on the job needs to know and understand how to:				
	SA4. Effectively communicate information to team members				
	SA5. Inform employees in the plant and concerned functions about events, incidents				
	& potential risks observed related to Safety, Health and Environment.				
	SA6. Question operator/ supervisor in order to understand the safety related issues				
	SA7. Attentively listen with full attention and comprehend the information given by				
	the speaker during safety drills and training programs.				
B. Professional Skills	Judgmental Thinking				
	The user/individual on the job needs to know and understand how to:				
	The usery marriadar on the job needs to know and anderstand now to.

	Suitability of work pieces and consumables: e.g. correct type and code; correct form;				
	correct dimensions; damage free; correctly issued				
	KB5. Knowledge of tools and equipment used for the fitting operations				
	KB6. Importance and procedures to ensure that tools and equipment are in a safe and				
	usable condition.				
	KB7. Correct techniques and procedures to carry out specific fitting operations by ha tools and manually operated machines				
	tools and manually operated machines				
	KB8. Understanding importance of securing the work piece correctly using appropr				
	devices and mechanisms				
	KB9. Importance of reporting problems immediately and accurately				
Skills (S)w.r.t. the scop	e				
Element	Skills				
A. Core Skills/	Communication				
Generic Skills	The individual on the job needs to know and understand how to:				
	SA1. Interpret information correctly from various job specification documents,				
	manuals, health and safety instructions, etc.				
	SA2. Communicate with people in respectful form and manner in line with				
	organizational protocol.				
	Numerical and computational skills				
	The individual on the job needs to know and have:				
	SA3. Basic Knowledge of numerical operations, and calculations/ formulae etc.				
	Basic shapes: Basic Knowledge of shapes like square, rectangle, triangle, circle etc.				
	SA4. Basic Knowledge of appropriate measuring techniques a philon nits of measurement				
B. Professional Skills	Judgmental Thinking				
The user/individual on the job needs to know and understand how to:					
	SB1. Use common sense and make judgments during day to day basis				
	SB2. Communicate problems appropriately to others				
	SB3. Identify sources of information and support for problem solving				
	SB4. Seek assistance and support from other sources to solve problems.

Unit Code	RSC/N4108 (CPC/N0418)		
Unit Title (Task)	Basic Knowledge of Communication/soft skills		
Description	This OS is about ensuring a Person with this attribute has the ability to work in various situations equally well and move from one situation to another with ease and grace. The ability to be diplomatic and respectful even when there are disagreements is also a key soft skill. This skill requires the employee to maintain a professional tone and demeanor even when frustrated.		
Scope	The individual needs to		
	<ul> <li>Basic Knowledge on functions of computer &amp; operations of computer.</li> <li>Effective communication.</li> <li>Inter personal skills</li> </ul>		
Performance Criteria	(PC) w.r.t. the Scope		
Element	Performance Criteria		
Communication and its importance	<ul> <li>The individual on the job should be able to:</li> <li>PC1. Learn about Fundamental of Computers.</li> <li>PC2. Identify the components of Computer: - Hardware and the software</li> <li>PC3. Accurately receive information and instructions from the supervisor/operator and fellow workers, getting clarification where required</li> <li>PC4. Accurately pass on information to authorized persons who require it and within agreed timescale and confirm its receipt</li> <li>PC5. Display helpful behavior by assisting others in performing tasks in a positive manner, where required and possible</li> <li>PC6. Consult with and assist others to maximize effectiveness and efficiency in carrying out tasks.</li> <li>PC7. Display active listening skills while interacting with others at work</li> <li>PC8. Use appropriate tone, pitch and language to convey politeness, assertiveness, care and professionalism</li> <li>PC9. Demonstrate responsible and disciplined behaviors at the workplace</li> <li>PC10. Escalate grievances and problems to appropriate authority as per procedure to resolve them and avoid conflict.</li> </ul>		
Elements and Principles of Communication	<ul> <li>Basic Study of Elements of the Soft communication skills:-</li> <li>Stimulus</li> <li>Encoding/message</li> <li>Channel</li> <li>Decoding</li> <li>Receiver</li> <li>Barriers</li> <li>Principle of Communication Process</li> <li>Clarity</li> <li>Conciseness</li> </ul>

#### CRITERIA FOR ASSESSMENT OF TRAINEES

### Job Role: Machine Operator Assistant – Blow Moulding Qualification Pack Code: RSC/Q 4101 CPC/Q0403

#### Sector Skill Council: Rubber Skill Development Council

**Guidelines for Assessment:** 

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also laydown proportion of marks for Theory and Skills Practical for each PC.

2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.

3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training centre (as per assessment criteria below)

4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/training centre based on this criteria.

5. To pass the Qualification Pack, every trainee should score a minimum of 70% in every NOS.

6. In case of successfully passing only certain number of NOS's, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.

	Assessable outcome		Marks A	Allocation
NOS	Performance Criteria	Total	Theory	Practical
RSC/N4101 (CPC/N 0411):	PC1. Wear protective clothing/equipment for specific tasks and work conditions	2.5	0.5	2
Maintain basic health and	PC2. Carry out safe working practices while dealing with hazards to ensure the safety of self and others.	2.5	0.5	2
at the	PC3. Apply good housekeeping practices at all times	2.5	0.5	2
	PC4. Use the various appropriate fire extinguishers on different types of fires correctly	2.5	0.5	2
	PC5. Demonstrate rescue techniques applied during fire hazard, demonstrate good housekeeping in order to prevent fire hazards, demonstrate the correct use of a fire extinguisher.	2.5	0.5	2
	PC6. Identify activities which can cause potential injury through sharp objects, burns, fall, electricity, gas leakages, radiation, poisonous fumes, chemicals, loud noise, and Identify areas in the plant which are potentially hazardous/unhygienic in nature. Conduct regular checks with support of the maintenance team on machine health to identify potential hazards due to wear and tear of machine.	2.5	0.5	2
	PC7. Inform the concerned authorities on the potential risks identified in the processes, workplace area/ layout, materials used etc, Inform the concerned authorities about machine breakdowns, damages which can potentially harm man/ machine during operations.	2.5	0.5	2

![](_page_43_Picture_0.jpeg)

![](_page_43_Picture_1.jpeg)

![](_page_43_Picture_2.jpeg)

	PC8.	Create awareness amongst other by sharing information on the identified risks.	2.5	0.5	2
	PC9.	Follow the sorting process and check that the tools, fixtures & jigs that are lying on workstations are the ones in use and un-necessary items are not cluttering the workbenches or work surfaces.	2.5	0.5	2
	PC10.	Ensure segregation of waste in hazardous/ non Hazardous waste as per the sorting work instructions	2.5	0.5	2
	PC11.	Follow the technique of waste disposal and waste storage in the proper bins as per SOP	1.5	0.5	1
	PC12.	Segregate the items which are labeled as red tag items for the process area and keep them in the correct places	1.5	0.5	1
	PC13.	Sort the tools/ equipment/ fasteners/ spare parts as per specifications/ utility into proper trays, cabinets, lockers as mentioned in the 5S guidelines/ work instructions	1.5	0.5	1
	PC14. PC15.	Ensure that areas of material storage areas are not overflowing Properly stack the various types of boxes and containers as per the size/ utility to avoid any fall of	1.5	0.5	1
		items/ breakage and also enable easy sorting when required			
	PC16.	Return the extra material and tools to the designated sections and make sure that no additional material/ tool is lying near the work area	1.5	0.5	1
	PC17.	Follow the floor markings/ area markings used for demarcating the various sections in the plant as per the prescribed instructions and standards.	1.5	0.5	1
	PC18.	Follow the proper labelling mechanism of instruments/ boxes/ containers and maintaining reference files/ documents with the codes and the lists	1.5	0.5	1
	PC19.	Check that the items in the respective areas have been identified as broken or damaged	1.5	0.5	1
	PC20.	Follow the given instructions and check for levelling of fluids, oils, lubricants, solvents, chemicals etc. and proper storage of the same To avoid spillage, leakage, fire etc.	1.5	0.5	1
	PC21.	Make sure that all material and tools are stored in the designated places and in the manner indicated in the 5S instructions.	1.5	0.5	1
		Sub total	40	10	30
RSC/N4102 (CPC/N 0412): Fitting Tools	PC1.	Comply with health and safety, environmental and other relevant regulations	1.5	0.5	1

	PC7.	Basic Knowledge of Intermitted blow moulding process:- Reciprocating screw extruder, Ram accumulator extrusion Accumulator head method	1.5	0.5	1
	PC8.	Basic Study of Extrusion blow moulding (EBM)	1.5	0.5	1
	PC9.	Basic Study of Injection blow moulding(IBM)	1.5	0.5	1
	PC10.	Basic Study of Injection Stretch blow moulding process (ISBM)	1.5	0.5	1
	PC11.	Basic Study of Extrusion Stretch Blow Moulding	1.5	0.5	1
	PC12.	Basic Knowledge of Various types of blow moulds- Side feed, Centre Feed, Spiral Mandrel, Extrusion Blow, stretch Blow, Injection Blow moulds etc.	1.5	0.5	1
	PC13.	Make the plastic compound or granule ready for feeding into the machine	2.5	0.5	2
	PC14.	Start the machine and feeding simultaneously	2.5	0.5	2
	PC15.	Ensure that moulding pressure and temperature is maintained during the process cycle	2.5	0.5	2
	PC16.	Ensure mould lifting/ ejection/ slide mechanism of the press are properly functioning	2.5	0.5	2
	PC17.	Manufacturing the preform as per SOP	2.5	0.5	2
	PC18.	Remove the Manufacturing the preform from the mould as per SOP.	2.5	0.5	2
	PC19.	Check for operation of moulding apparatus like hopper, heaters, extruder, blow moulding die/mould, screen pack etc. as per the checklist provided	2.5	0.5	2
	PC20.	Fix the desired die/mould to the blow moulding machine apparatus in order to achieve the desired operation as per the Work Instructions/ SOPs.	2.5	0.5	2

![](_page_47_Picture_0.jpeg)

![](_page_47_Picture_1.jpeg)

![](_page_47_Picture_2.jpeg)

	PC21.	Preliminary requirement and preparation of raw material use weighing machines to measure the quantity of granules and ensure that the correct quantity of granules are put in the hopper	2.5	0.5	2
	PC22.	Setup the apparatus as per the selected process and the moulding standards used in the processing industry	2.5	0.5	2
	PC23.	Ensure availability of the coolant and working of valves to circulate the coolant to cool and solidify plastic.	2.5	0.5	2
	PC24.	Ensure the functionality and assembly of die as per SOP.	2.5	0.5	2
-	PC25.	Die shaping in blow moulding.	2.5	0.5	2
	PC26.	Basic Study of Blow Ratio, parison swell, Die Swell, Types of Parison Blowing system:-Pneumatic and ejection system.	2.5	0.5	2
	PC27.	Understand & Basic knowledge about the moulding procedure and process to be adopted for completing the work order from the supervisor/operator by referring the Work Instruction document/ SOP manual	2.5	0.5	2
	PC28.	Understanding the raw material like plastics granules, fillers, bonding additives grades etc. required for executing the activity	2.5	0.5	2
	PC29.	Ensure that the required material is procured from the store before starting the process.	2.5	0.5	2
	PC30.	Understand the type of Die required for executing the required operation and ensure that the same is available for operations	2.5	0.5	2
	PC31.	Understand the number of heaters required for the extruder assembly, heater temperature and current required for the heating operations as mentioned in the Work Instructions/ SOP manual. Ensure housekeeping safety in the moulding area. Use lifting equipments or for lift/trolley for mould/material. Keep all safety requirements.	2.5	0.5	2
	PC32.	Ensure that the plastic granules are mixed with additives (if any) before being fed into the hopper	2.5	0.5	2
	PC33.	Check the hollow articles (bottles, container) for geometry, material & dimensional parameters as per the Control Plan before starting the production.	2.5	0.5	2
	PC34.	Ensure that the dimensions of the output product are measured as per the process given in the Work Instructions/ SOP	2.5	0.5	2
	PC35.	In case the test product matches the dimensions and quality of the final output, start the production process	2.5	0.5	2
	PC36.	Feed the required plastic material in the apparatus for heaters to melt the plastic granules at the	2.5	0.5	2

Qualifications	Pack For	Machine	operator	Assistant Blow	Moulding
----------------	----------	---------	----------	----------------	----------

	predefined temperature			
	PC37. Ensure feeding in line with the defined standards and specifications	2.5	0.5	2
	PC38. Ensure the proper functioning of screen pack and die for uniform melting of plastic and removal of the contaminants (if any)	2.5	0.5	2
	PC39. Monitor & understand the process (parameters like temperature, pressure, speed etc.) by observing and analyzing the readings on various panels/ meters to prevent machine breakdown and deviations of the output from desired specifications	1.5	0.5	1
	PC40. Clean the die opening & die; changing the screen pack.	1.5	0.5	1
	PC41. Ensure code printing of the product with the identifying information (wherever required) and send the same for further processing	1.5	0.5	1
	PC42. Instruct the helper to neck finishing and pinch off of the product as per the desired geometric specifications.(doesn't required for IBM)	1.5	0.5	1
	PC43. Measure the final plastic moulded product and compare the dimensions as prescribed in the work order/ engineering drawing	1.5	0.5	1
	PC44. In case the parts are not as per the given measurements, send the same for further processing in terms of cutting, finishing etc.	1.5	0.5	1
	PC45. Helping to operator to Measure the specifications of the finished products using devices like micrometers, Vernier calipers, gauges, rulers, weighing scales, Thickness Gauge and any other inspection equipment and compare with the parameters given in the work order.	1.5	0.5	1
	PC46. Note down the observations of the basic inspection process and Identify pieces which are OK and also not meeting the specified standards	1.5	0.5	1
	PC47. Maintain records of each category of work outputs as per the batch etc. so that correction can be organized.	1.5	0.5	1
	PC48. Provide first and last output from each batch to the lab for quality check on its composition, properties etc.	1.5	0.5	1
	PC49. Obtain clearance for the entire batch from the lab	2	1	1
	Sub total	100	25	75
RSC/N4106 (CPC/N 0416):	PC1. Some duties include: Inspecting, monitoring, operating fuel systems, fuel oil transfer & supply lines & associated equipment and fossil fuel chillers.	1.5	0.5	1

Auxiliary equipments in Plastics processing.	PC2.	Operating condensate & feed water systems, circulating & cooling water systems, condensate & makeup systems, circulating service water treatment equipment, auxiliary lube oil systems, emission control equipment and miscellaneous equipment. Pass onsite training programs. Follow safety rules, regulations and procedures.	1.5	0.5	1
	105.	production requirements and makes initial checks of operating conditions before initiating production runs.	1.5	0.5	Ť
	PC4.	Connects basic plant services as needed to meet production requirements and makes initial checks of operating conditions before initiating production runs.	1.5	0.5	1
	PC5.	Basic Knowledge of different types of Predrier-Hot air Oven, Hopper Driers, Dehumidifiers etc.	1.5	0.5	1
	PC6.	Basic Knowledge of Chiller, Cooling Tower for the controlling temperature of Mould, machine and Fluids.	2.5	0.5	2
	PC7.	Basic Knowledge of Operation and Monitoring Watching gauges, dials, or other indicators to make sure a machine is working properly.	2.5	0.5	2
	PC8.	Basic Knowledge of Compressor and Scrap Grinder.	2.5	0.5	2
	PC9.	Understand Equipment Maintenance Performing routine maintenance on equipment and determining when and what kind of maintenance is needed.	2.5	0.5	2
	PC10.	Understand Equipment Maintenance Performing routine maintenance on equipment and determining when and what kind of maintenance is needed.	2.5	0.5	2
	PC11.	Understand & Follow the instructions given on the equipment manual describing the operating process of the equipment	2.5	0.5	2
	PC12.	Follow the Safety, Health and Environment related practices developed by the organization	2.5	0.5	2
	PC13.	Ensure relevant safety board's/ signs are placed on the shop floor	2.5	0.5	2
	PC14.	Operate the machine using the recommended Personal Protective Equipment (PPE) and ensure team members also use the related PPEs at the workplace	2.5	0.5	2
	PC15.	Maintain a clean and safe working environment near the work place and ensure there is no spillage of chemicals, production waste, oil, solvents etc.	2.5	0.5	2
	PC16.	Attend all safety and fire drills to be self-aware of safety hazards and preventive techniques	2.5	0.5	2
	PC17.	Maintain high standards of personal hygiene at the work place	2	1	1
	PC18.	Ensure that the waste disposal is done in the designated area and manner as per organization SOP.	3	1	2

RSC/N4107 (CPC/N 0417):	PC1.	Basic Knowledge about Mould Manufacturing Process and machineries.	5	1	4
Mould Technology Techniques for	PC2.	Basic Knowledge to identify and confirm resources required such as components, machinery, range of materials and processes	3	1	2
Plastics	PC3.	Basic Knowledge about Mould Materials.	7	3	4
Processing	PC4.	Identify type of equipment required for machining components based on the operations selected.	5	1	4
	PC5.	Basic knowledge about Construction and study of Moulds for EBM, IBM, and SBM.	5	1	4
	PC6.	Basic Knowledge of Mould cooling systems:- Pneumatic, water cooling	5	1	4
	PC7.	Basic Knowledge of Mould Polishing & its kits	5	1	4
	PC8.	Understand & Follow the instructions given on the equipment manual describing the operating process of the equipment	5	1	4
		Sub total	40	10	30
RSC/N4108 (CPC/N 0418): Basic Knowledge of Communication /soft skills	PC1. PC2.	Accurately receive information and instructions from the supervisor/operator and fellow workers, getting clarification where required Accurately pass on information to authorized persons who require it and within agreed timescale and confirm its receipt	8	2	6
	PC3.	Display helpful behavior by assisting others in performing tasks in a positive manner, where required and possible	4	1	3
	PC4.	Basic Knowledge of consult with and assist others to maximize effectiveness and efficiency in carrying out tasks.	4	1	3
	PC5.	Basic Study of Fundamental of Computers.	4	1	3
	PC6.	Components of Computer: - Hardware and the software	4	1	3
	PC7.	Display active listening skills while interacting with others at work	4	1	3
	PC8.	Use appropriate tone, pitch and language to convey politeness, assertiveness, care and professionalism	4	1	3
	PC9.	Demonstrate responsible and disciplined behaviors at the workplace	4	1	3
	PC10.	Escalate grievances and problems to appropriate authority as per procedure to resolve them and avoid conflict.	4	1	3
