From COO desk:

“Technological intervention has found its way into our lives at all levels. Digitization being the new norm, has been impacting our lives big time. The impact is so beneficial that it’s worth all the efforts put in. Training and skill development being no different, are also evolving rapidly. Thinking ahead of time, RCPSDC has launched a meticulously designed digital learning platform called eKaushalacharya, which offers a promising solution, providing digital training in rubber and plastic sectors, helping to shape the future of the youth making them well equipped and future ready” said Ms. Shewani Nagpal, COO of RCPSDC.

eKaushalacharya- A step Ahead eLearning

In order to keep pace with the ongoing disruptive evolution throughout the world, in the field of education and training, it gets necessary to keep pace and continue to upgrade and upskill. Keeping this in mind, RCPSDC has launched a digital learning platform, eKaushalacharya which is a one stop solution for providing training through instructionally designed e-courses, enriched with illustrations, infographics, animations and live videos. The live classroom feature offers trainer lead learning to the candidates providing personalized assistance in understanding the complex processes and resolving their queries.

eKaushalacharya follows a blended learning model wherein the courses cover 40% theory, 20% practical and 40% on-the-job training. QP (Qualification Pack) and domain & generic NOSs (National Occupational Standards) are the core foundation of the courses, further assisting in finding the right candidates for training as per the eligibility criteria. These courses are open for anyone willing to get skilled in the Rubber and Plastic sectors through e-learning.

Not just training, but assessments are also a very important part of our e-learning courses, with a passing criteria of 70%. Post successful completion of the assessments, the students are certified by RCPSDC, NSDC and MSDE. The certified candidate's in turn become employable thus contributing towards the economic development of the industry and the nation along with earning their livelihood.

With numerous applications, fulfilling the basic requirements, unique program structure and outstanding features, eKaushalacharya has proven to be an extremely useful e-learning platform which is unique, yet truly useful for the youth who wish to get skilled in the rubber and plastic sector.

eKaushalacharya- The platform for digital learning

Technology is the key player in today's world where every small and big task is driven by technology. The youth of today is so used to of technology that they prefer everything to be done through a fingertip. Amidst this disruptive evolution, eKaushalacharya stands out as a promising solution providing training through digital platform remotely which is well taken by the youth of our country.

“Technology will not replace great teachers but technology in the hands of great teachers can be transformational.”

George Couros

Truly believing in this eKaushalacharya ensures to include the personalised touch offered by the trainers, so as to carry forward the age old legacy of Guru-Shishya (Trainer and trainee) through live classroom feature where the trainees can interact with their trainers in a live class environment. On the other hand, the trainer gets various tools like animations, illustrations and live videos to aid in explaining complex processes with ease.

Industry Fact

With the surge in the demand of eLearning owing to the shift of training/ education from physical to remote mode, the e Learning market is heading towards exceeding USD 1 trillion by 2027 according to a new research report by Global Market Insights, Inc.

Know Our Team

Amidst the ongoing pandemic the best thing that happened to me was that I joined this amazing team of enthusiastic professionals at RCPSDC last September 2020. Ever since I have been learning and growing as a professional while contributing towards the skilling initiatives in Rubber and Plastic sector, supervising the standard and learning department and enthusiastically looking forward towards catering to the Chemical sector.

Dr Ashrita Tripathi
Senior Manager- Standard and Learning

Student Testimonials

Poonam Debnath

Course - B. Voc Rubber Technology,
Tripura University

I am Poonam Debnath, daughter of an Indian Army Soldier. I am currently pursuing 6th Semester of my course. Skill India Mission is a great start for training in various sectors. As beneficial as it is in enhancing one's skills, it's also beneficiary for industrial development. The course has provided enormous amount of knowledge about Rubber manufacturing, processing, production, testing and many more. It is a wonderful experience to learn and upgrade my education amidst this pandemic.

Kakan Debnath

Course - B. Voc Rubber Technology,
Tripura University

I am Kakan Debnath. I was born in Sabroom South Tripura. My father is a primary teacher and he is the only earning member of my family. My family's financial condition has not been stable, due to which we had to face many sacrifices. I have a keen interest in Skill based training and this is why I enrolled in this course. I want to study more and be independent enough that I am able to support my family and lead a better life.
