RCPSDC initiates skill training in newly approved plastic job roles

Students undergoing training for the job role of 'Designer-Mould and Die for Plastic' at Nashik, Maharashtra

Maharashtra State Skill Development Society (MSSDS) under the Government of Maharashtra has engaged the Rubber, Chemical & Petrochemical Skill Development Council (RCPSDC) for skill training of disadvantaged communities in the lucrative newly approved job roles in the plastic industry. Having interacted closely with the Plastic industry and understanding their requirements for individuals trained in specific skills, RCPSDC has diligently created course content for skill training in new and approved job roles in the Plastic sector.

The skill trainings will be provided under the SANKALP programme across 10 districts of Maharashtra to 420 beneficiary candidates. **Skills Acquisition and Knowledge Awareness for Livelihood Promotion (SANKALP)** Scheme is a programme of the **Ministry of Skill Development and Entrepreneurship (MSDE)** with a focus on improving access to skill training for Women, SC/ST and other marginalized weaker sections of the society.

“Plastic industry is one of the largest employment-generating industries in India. The industry is poised to witness a significant increase in employment opportunities in view of the increased turnover as projected. Equipping the industry with employment ready candidates to meet the demand for new job roles is a win-win for both the industry and the job aspirants”

Dr Ashrita Tripathi, Head – Training and QA, RCPSDC

For the project, RCPSDC will undertake the setting up of training centres, selection of training partners, training of trainers, assessment & certification and will also assist in placements and post-placement tracking.

“Maharashtra State Skill Development Society is committed to connect marginalized sections to employment opportunities in different sectors with large growth potential including the plastic sector. We are sure the skill training by RCPSDC will lead to productive employment that meets the aspirations of the trainees”.

Mr Ravi J Patil, Additional CEO & Mission Coordinator, MSSDS

Training will be provided under both Plastic manufacturing and Plastic Recycling sub-sectors of the Plastic Industry. The two job roles in the Plastic Recycling sub-sector for which training will be provided include Operator- Plastic Waste Recycling and Processing and Plastic waste segregator.

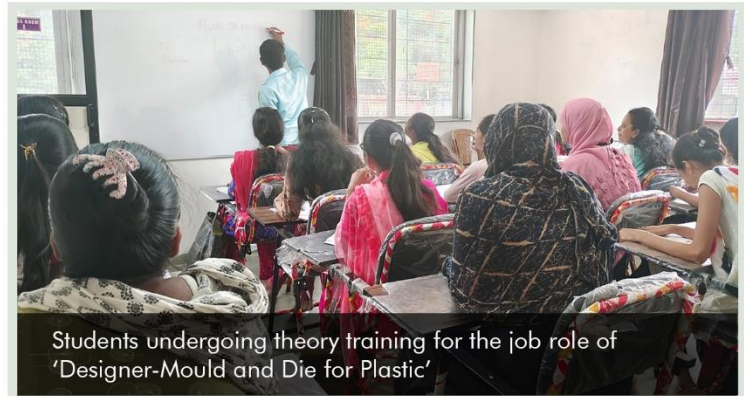

The five job roles under the plastic manufacturing sub-sector for which training will be provided include Designer-Plastic Product, Jr. Designer-Mould and Die for Plastic, Designer-Mould and Die for Plastic, Jr. Designer-Plastic Product and Operator-Printing and Packaging.

Though new, all the job roles are NCVET approved and NSQF aligned. The training ranges between 350 to 480 hours. There are 60 candidates in each of the seven job roles for which training will be provided.

The 10 districts covered under the project include Aurangabad, Pune, Ratnagiri, Osmanabad, Nandurbar, Nashik, Nagpur, Sindhudurg, Washim and Gadchiroli.

Currently, the Plastic industry in India is worth Rs 3 lakh crore annually. The industry is looking at a significant push to domestic operations through import substitution and enhancing export markets. As an ally, RCPSDC is working towards meeting the requirements of skilled employees in the plastic sector, especially in the states like Maharashtra which account for a significant number of plastic manufacturing units.

RCPSDC undertakes Mega skill training project with DAY-NULM at Rajasthan

Rubber, Chemical & Petrochemical skill Development Council (RCPSDC) has embarked upon a mega drive to train nearly 1500 individuals in highly lucrative job roles of plastics sector in the state of Rajasthan. The drive has been launched under the aegis of Deendayal Antyodaya Yojana-National Urban Livelihoods Mission (DAY-NULM). An MoU to this effect was signed recently between RCPSDC and DAY-NULM, Rajasthan.

National Urban Livelihoods Mission (NULM) is ground breaking project under the **Ministry of Housing and Urban Poverty Alleviation, Govt. of India** and is aimed at reducing poverty and vulnerability of the urban poor households by enabling them to access gainful self-employment and skilled wage employment opportunities leading to an appreciable improvement in their livelihoods. Increased contribution of skilled urban poor to the national economy will ensure the inclusive growth.

The training is being provided under Employment through Skills Training & Placement (EST&P) segment of the DAY-NULM. The job roles under which training is being provided include Machine operator – Plastic blow moulding and Machine operator – Plastics recycling.

Most of the trainings will take place in the Hanumangarh District where 600 candidates will undergo training for the job role of Machine Operator-Plastics Recycling and nearly equivalent number in Machine Operator – Blow Moulding in the district.

Students undergoing training for the job role of 'Machine operator – blow moulding'

Besides Hanumangarh, nearly 240 candidates will undergo training for the job role of Machine Operator – Blow Moulding at Jaipur. The training drive will end in December 2022.

The Employment through Skills Training & Placement (EST&P) Component under National Urban Livelihood Mission (NULM) under which RCPSDC is imparting training in Rajasthan is designed to provide skills to the unskilled urban poor as well as to upgrade their existing skills. The skilling drive launched by RCPSDC under EST&P program in association with DAY-NULM Rajasthan is intended to fill the gap between the demand and availability of skilled workforce in the plastics sector in the state of Rajasthan by imparting skill training in some of the most sought after job roles.

Know Our Team

Ms Suchita Roy

Regional Manager-West

It's a great pleasure for me to be associated with RCPSDC since 2017 as a Manager for the West region of India. I am working closely with the State Government departments and other stakeholders and focusing on industry connects to identify the skill gap and training needs of the Rubber, Chemical and petrochemical sectors. Being an educator, I like to take initiatives to increase the employability of rural and urban unemployed youth by undertaking skill development training programs through State and Central Government projects and with the Educational Institutions.

I extend my gratitude to the RCPSDC team for their immense support, guidance and encouragement and I look forward to continuing my journey with RCPSDC and contributing to its future growth and prosperity.
